**Independent arc sensors** provide dependable arc detection.

**VSi™ features X-Mode and three independent arc sensors** for unsurpassed arc detection. X-Mode prevents sunlight from darkening the lens before welding starts and low-amperage lens opening from obstructed sensors.

**VSi and FS#10 Flip-Up feature integrated grinding shields.** Provides impact protection and a clear view for grinding.

**Auto-on/off power control** triggers lens at the strike of an arc.

**Meets ANSI Z87.1+ and CSA standards.**

**Optional helmet lighting accessory kit** includes two lights (one for each side) and all required mounting hardware.

Auto-darkening lens is warranted for two years.
