Accu-Rated™- Not Inflated **Generator Power**

The Fusion 160 delivers a smooth, stable arc from either engine power or 120/240-volt utility power, providing a unique combination of versatility and productivity in a lightweight package.

Easier to transport.

Fusion 160 welder/generator weighs 242 pounds. That's up to 50 pounds less than similar machines, so moving the Fusion 160 is easier and faster. Less time is spent waiting, and more work can get done.

Less rework.

The Fusion 160 uses inverter technology to deliver a smooth, stable stick arc that's forgiving of variations in arc length and travel speed, so it's easier to produce clean welds that meet specifications — and avoid the time and expense of rework.

Work anywhere convenience.

PowerShift technology provides weld capabilities using either the Fusion 160 gasoline engine or 120/240-volt utility power. You'll have the confidence of knowing that you can weld virtually anywhere outdoors and indoors — with just one machine.

The multi-voltage plug (MVP™) makes it easy to connect the welder to either 120- or 240-volt power.

Welder/generator is warranted for three years, parts and labor. Engine is warranted separately by the engine manufacturer.

Power Usage Guide

The power generator is designed to provide **strong power** while keeping the voltage within 10 percent of 120/240 V. $120/240 \text{ V} \pm 10$ percent is the range where tools and motors are designed to operate. **This increases tool/motor performance and tool/motor life**.
